Patent pending.

The new Disconnect Detection Device (D3) eliminates the risk of fire, explosion or electrical failure due to the improper handling of battery charging equipment.

- Monitors battery and charger connection constantly
- Senses any attempt to improperly disconnect cables during charge cycle
- Cuts off current between battery and charger automatically
- Prevents arcing and other potential hazards
- Reinstates charge cycle in event of a false trip
- Reduces connector repairs/replacements

**A few hundred dollars could save
you thousands!**
