

For energy efficiency, power, performance and productivity

# There's only one

# Maverick™

## High Frequency Opportunity Charger

Featuring exclusive true green technology for significant energy cost savings, reduced CO<sup>2</sup> emissions, minimal noise, and low battery recharge temperature — all with additional power capacity and a full load power factor of .95!

### Add it up!

With a Maverick, you can save up to \$300 in energy costs per charger per year. Save even more energy with a programmable electrical cost control feature that lets you stagger start times outside high-cost peak demand cycles.

### We'll show you how!
