

## Battery Available System

*The Power of Excellence*

*Always selects the battery that is fully charged  
and has the longest time to cool.*

### Standard Features

- A single control panel can monitor 16 chargers.
- Six control panels can be ganged to monitor a total of 96 chargers.
- Battery chargers can be located up to 50 feet from the control panel.
- Each control panel can drive a display panel.
- The two digit display panel with bright 5 inch numbers is easily readable from 100 feet away.
- A 3 digit display, with manually set first digit, is available for installation with more than one battery rating.
- The display panels can be located up to 50 feet from any control panel.
- Interconnecting cables are telephone type wire with standard telephone connectors.
- Interconnecting cables carry only low level digital signals.
- Each module is independently powered for greater flexibility.
- Control panels plug directly into Applied Energy's WorkHorse 2™ charger, WorkHorse 3™ charger, and Retrofit Unit with RT05 plus control boards.
- Upgrade kits are available for Retrofit MC05 and other manufacturer's chargers.
- Rugged industrial grade construction.
